# Smart Hub™

by **Tunstall**

Ask us about our range of personal home safety and security products

## Smarter home safety

The **Smart Hub™** will give you and your family the peace of mind to remain living safely and independently.

from  
**\$1.20\*/day**

\*average daily cost over 365 days including 24/7 monitoring

## How it works

Each **Smart Hub™** comes with a personal pendant that can be worn on the wrist or around the neck, allowing you to activate an alarm call from anywhere in the home, without having to struggle to reach a phone. Alternatively, the alarm can be activated by the red help button. With a powerful speaker and microphone, two-way voice communication is easy, wherever you are in the home.

When the **Smart Hub™** is activated in an emergency, it automatically contacts the monitoring centre, putting you in contact with one of our trained care consultants who will assess the situation and determine what action needs to be taken; such as calling a family member or friend, after-hours doctor or calling an emergency service like an ambulance. The pendant confirms alarm activation for the wearer via a green light. Care consultants always stay on the line until help arrives, providing added reassurance. We will also keep your family and support network informed should you need to go to hospital.

## Key Safe

- Secure your keys outside for safe, quick access to your home in an emergency.
- Avoids delays and damage to property and fits up to 5 standard house keys.
- Easy to use - set and reset your own code.
- Solid, waterproof, rustproof and shatterproof.

## Vibby Fall Detector

The Vibby fall detector is a sleek, contemporary and technologically advanced fall detector which can be worn on the wrist or around the neck.

It will automatically raise an alert if it senses the user has fallen, and also enables the wearer to easily call for help manually.

The Vibby fall detector can give confidence to anyone who is at risk of falling, such as:

- People with limited mobility
- Older people
- People with disabilities
- People living with diabetes, Parkinson's Disease, epilepsy

**Alarms are quick and easy to install.**
